

D2000 Quick-Actuating Closures

Sizes: 32- to 48- inch

T.D. Williamson

Bulletin No: 5100.005.00

Version: 06.2020

Supersedes:

■ D2000 Quick-Actuating Closures

Description

The T.D. Williamson quick-actuating closure is easily operated by one person. The closure is designed primarily for horizontal installation, meaning the door swings open on the horizontal axis. However, the closure may be installed on a vertical installation. In the latter case, a counterbalance can be provided to facilitate opening.

Features

The closure, available in sizes 32-inch to 48-inch, offers important advantages:

A reliable seal – The large, cross-sectional diameter O-ring located on the periphery of the closure's barrel collar provides positive sealing as well as protection from damage by tools, pigs or debris.

Pressure indicating device – The closure is equipped with a pressure warning lock, in accordance with UG-35 of ASME BPVC Sect. VIII, Div. 1, to alert the operator to the existence of internal pressure prior to opening the closure.

Safe, reliable operation – After being safely depressurized, the D2000 closure can be opened or close in a single motion while the operator stands safely to the side by utilizing the side screw assist feature. The closure also has a door assist to aid in closing the door

Options

T.D. Williamson is committed to providing you with the exact product to assist you in planning, budgeting and meeting the specifications for your individual application needs.

Expanded Mechanical Options:

- Flanged Closure

Expanded Range of Applications:

- ASME B31.4/31.8 and CSA Z662 Category II, 0.5 and 0.6 design factors, ANSI class 600
- Standard ASME BPVC Sec. VIII Div 1 U-Stamp on door
- NACE MR0175 compliant
- -50 to +250 F (-45.5 to 121 C)

Consult factory for optional items.
