660 Tapping Machine

Sizes: 3- to 12-inch

Model 660C

T.D. Williamson

Bulletin No: 1000.005.09
Version: 06.2018
Cross Indexing No: n/a
Supersedes: 1000.005.08 (03.2018)

Description

Tapping machines are used for making connections to pipelines, tanks, and plant piping without shutdown and are used to make hot taps in preparation for plugging machine applications.

Tapping machines are also used to set completion plugs such as LOCK-O-RING® or LOCK-O-RING® Plus plugs after completion of hot tapping and plugging operations.

Model 660C Tapping Machines can be either air or hydraulically operated and are used for making pipe and tank taps from 3" to 12" (DN 80 to DN 300). Its maximum working pressure is 1,480 psi (100 bar) at 100°F (38°C). Its operating temperature is -20°F (-29°C) to 700°F (371°C) at 700 psi (48 bar) for intermittent service. Its maximum continuous rating is 350°F (177°C) at 1,025 psi (70 bar).

This model features a split-frame for lower maintenance costs and ease of packing replacement.

Features

The basic machine includes:

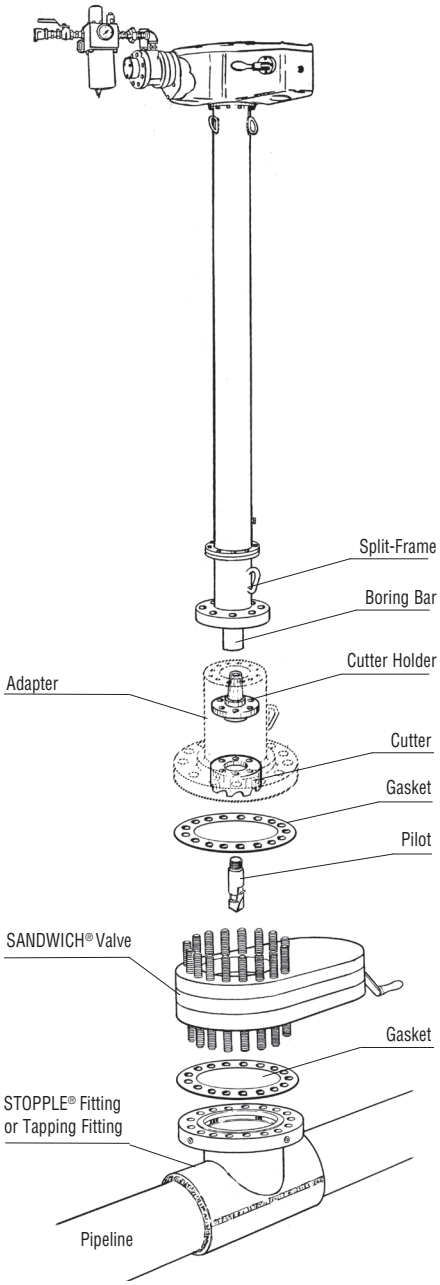
- Lower-in crank
- Measuring rod
- Retainer rod pusher
- Ring gasket
- Bleeder valve and nipple
- Motor adapter
- Set of bolts and nuts
- LOCK-O-RING® bypass gauge
- Capability to set LOCK-O-RING® and LOCK-O-RING® Plus completion plugs

Options*

T.D. Williamson is committed to providing you with the exact product to assist you in planning, budgeting and meeting the specifications for your individual application needs. The following options are available:

- Model 660c Tapping Machine can be either air or hydraulically operated with optional dual drive.
- A flywheel can be installed on the tapping machine. It enhances performance of the tapping machine due to inertia and reduced stress on the gears.
- Hydraulic feed system can be installed as an option. It will assist technician to lower the completion plug during plug setting process.

Typical Tapping Setup



* For design code options not listed and additional sizes, consult your sales representative.

660 Tapping Machine *Model 660C*

Operating Specifications

Boring Bar Travel	42" (1,067 mm)
Tank Taps*	3" through 12" (80-300 mm)
Pipe Taps*	3" through 12" (80-300 mm)
LOCK-O-RING® and LOCK-O-RING® Plus Completion Plugs	4" through 12" (100-300 mm)
Max. Operating Pressure	1,480 psi (100 bar) at 100°F (38°C)
Max. Operating Temperature	700°F (371°C) at 700 psi (48 bar)**
Power	Hydraulic or Air Motor
Feed Rate	Standard .005" (.127 mm) per revolution/optional .003" (.076 mm) per revolution
Lower-In Crank	4-1/2 turns per inch (5.6 mm per turn)
Length without measuring rod	64-1/2" (1,638 mm)
Length with measuring rod	110-1/2" (2,087 mm)
Meets NACE specification	MR0175

* See note 5 in "Recommended Power Options" chart. ** For intermittent service only. Maximum continuous rating is 350°F (177°C) at 1,025 psi (70 bar).

Range of Tapping Machines

Operating options of the machine according to configuration by feed rate, type of drive and flywheel.
For example, the tapping machine PN 12300061 will have standard feed rate, air motor drive and flywheel.

	Feed Rate		Type of Hydraulic Drive			
Tapping Machine Part Number	Slow (.003" / Revolution)	Standard (.005" / Revolution)	Air Motor Drive	Single Motor Drive	Tandem Motor Drive	Flywheel

660 Tapping Machine *Model 660C*

Basic Machine Components

	Lbs.	Kg.	Part Number
Tapping machine body (standard feed)	490	227	05-1394-0000
Tapping machine body (slow feed)	490	227	05-1392-0000
Air motor drive unit*	40	18	05-2327-0000
Single drive unit & control valve*	45	20	05-2508-0000
Tandem drive unit & control valve*	100	46	05-1379-0000

* These options will work with both feed rate tapping machines (slow and standard).

Additional Equipment

	Lbs.	Kg.	Part Number
Skid*	179	81	05-1370-0000
Hydraulic Power Unit and 50' Hose (with oil)			
Manual Start/Diesel	585	266	05-2017-0000
Electric Start/Diesel	600	272	12303420
Manual Start/Gas	533	242	05-2351-0000
Electric Start/Gas	550	250	05-2354-0000
Hydraulic feed system for completion plug installation	45	21	05-1366-0000
Flywheel	46	21	05-2376-0000

* If skid is not purchased with the tapping machine, there will be an additional crating charge; consult factory.

■ Split-frame Feature

The frame assembly is split at the lower end so the lower section can be unbolted and removed over the drive tube and boring bar, and the packing replaced.

	F	F	F	F	F	F

Notes:

1. The following letters represent:
   A = Carbon steel pipe SMYS (Specified Minimum Yield Strength) 30,000 to 50,000 psi maximum, tensile strength of 70,000 psi.
   B = Carbon steel pipe SMYS 50,000 to 70,000 psi maximum, tensile strength of 90,000 psi.
   C = Cast iron pipe. Cutting characteristics vary widely; hard to predict.
   D = Chrome-moly, high temperature, steel pipe.
   E = 300 series stainless steel pipe.
   F = Flat-plate cuts using special cutters on the materials listed above (refer to Notes 3 and 4). Pilot drill must be through before cutter tooth engages material.
2. The dual hydraulic drive features an ability to shift from high speed/low torque to low speed/high torque when tapping the larger diameter pipes and/or the more difficult cutting steels.
3. The table for selecting power options (above) is based on the latest TDW designs and past experience. The data should be used as a guideline. There have been, and will be, conditions which will not strictly follow the guidelines.
4. Special cutters are available for flat plates, stainless steel pipe, cast iron pipe and other special conditions.
5. When tapping a larger pipe or tank, the cutter will sometimes go through the flat-plate condition. For example, all teeth are cutting at the same time. This is the most power-consuming condition possible and special cutters may be required. Considering cutter size, diameter of cylinder, wall thickness, feed rates, different materials of construction, etc., there are many possibilities. The following table gives some examples of flat-plate conditions. Any pipe or tank with wall thicknesses greater than those shown will also be considered flat-plate.

Cutter Size	Nom. Pipe x Wall	Nom. Pipe x Wall	Nom. Pipe x Wall
3"	4" x .359"	6" x .232"	8" x .176"
4"	6" x .481"	8" x .357"	10" x .282"
6"	10" x .748"	12" x .616"	14" x .556"
8"	18" x .776"	20" x .692"	24" x .571"
10"	24" x .980"	30" x .772"	48" x .475"
12"	36" x .943"	48" x .699"	60" x .556"
