

## EMERGENCY PIPELINE REPAIR SYSTEMS

# Your Assets. Lasting Protection.

Preparation for pipeline emergencies allows for quicker return to operation.

**Your customized TDW Emergency Pipeline Repair System (EPRS) minimizes downtime and disruption after an incident by:**

- Improving how well you evaluate risk
- Ensuring the right resources and qualified personnel will rapidly deploy from strategic locations
- Eliminating time-consuming red tape by consistently evaluating the pipeline, planning and responding quickly and confidently

**Equipment support:** store and maintain equipment at TDW facilities or within your own area, with logistics preparedness for rapid deployment.

**Pre-positioned inventory:** key components will be available for quick delivery to the job site.

**Optimized sequencing:** carefully planned and prioritized order of actions, addressing most critical tasks first.

**Ready to make your emergency response more efficient and effective? For more information, contact your TDW sales representative.**
