

1200 Tapping Machine

Tapping Sizes: 12- to 42-inches

Model 1200M / Completion plug setting sizes 12- to 36-inches

T.D. Williamson

Bulletin No. 1000.001.09

Version: 07.2025

Supersedes: 1000.001.08 (07.2024)

Description

Tapping machines are used for making connections to pipelines, tanks and plant piping without shutdown and are used to make hot taps in preparation for plugging machine applications.

T.D. Williamson Model 1200M Tapping Machines are designed to make hot taps into metal pipe, tank tops and walls*. They are hydraulically operated and are used for making taps from 12- to 42-inches (305 mm to 1067 mm). Maximum working pressure is 1,480 psi (100 bar) at 100°F (38°C). Operating temperature is -20°F (-29°C) to 700°F (371°C) at 700 psi (48 bar) for intermittent service. Maximum continuous rating is 350°F (177°C) at 1,025 psi (70 bar).

The 1200M Tapping Machine is fitted with a ladder and platform for operator use; meets NACE standard MR0175-2009 (sulfide stress cracking-resistant, metallic material for oilfield equipment; and can be used to install LOCK-O-RING® and LOCK-O-RING® Plus completion plugs from sizes 12- to 36-inches. The Tapping Machine Power Unit is compliant with EPA Tier 4 emission standards, has an emergency air shut-off valve and a four point lift system.

Features

The basic machine includes:

- Tapping machine
- Ladder and platform
- Hydraulic piping
- Skid
- Connecting hoses
- Power unit
- Two-stage drive motor
- Feed motor
- Crank handle

Typical Tapping Setup

* Consult the factory for special cutters and pilots required for tank taps.
