

STOPPLE® & STOPPLE® Plus Fittings

with the ProSeries Advantage

Sizes 4- to 36-inch, Class 600

T.D. Williamson

Bulletin No: **2100.023.06**

Version: 07.2026

Supersedes: 2100.023.05 (10.2024)

■ STOPPLE® Fitting

■ STOPPLE® Plus Fitting

Description

STOPPLE® and STOPPLE® Plus full-branch split tee fittings Class 600 with the ProSeries Advantage are designed for use with TDW STOPPLE® and STOPPLE® Train plugging system (except 4-inch). There are options to meet ASME B31.3/B31.4/B31.8 and CSA Z662 CAT I and CAT II specifications for use in piping, pipeline transportation and gathering systems for liquid, gas hydrocarbons and other fluids as well as refining locations.

STOPPLE and STOPPLE Plus fittings are furnished with LOCK-O-RING® and LOCK-O-RING® Plus flanges to accept LOCK-O-RING and LOCK-O-RING Plus completion plugs, respectively, permitting removal of the tapping valve after work is completed.

The TDW ProSeries Advantage means faster delivery times and broader standard code compliance

Features

Flange-to-sleeve weld-joints and sleeves are designed to meet pressure and reinforcement requirements of ASME and CSA codes and are available in Class 600. Other ASME Class ratings available upon request.

Most fittings are manufactured with a controlled maximum carbon equivalent of 0.43 to make welding easier in harsh environments. Back-up strips are standard and provided for all fittings.

All pressure-containing welds on the fittings have undergone X-ray inspection per ASME and API requirements.

Fitting sleeves are manufactured from a pressure-vessel quality, normalized and killed carbon steel plate with a hardness below 22 HRC.

The charpy impact value of the sleeves at -58°F (-50°C) is 28 J min / 37 J min-avg.

Standard fittings and completion plugs are fitted with Nitrile O-rings compatible with most pipeline products between -20°F to 250°F. The low temp fittings and completion plugs are fitted with low temperature FKM O-rings compatible with most pipeline products between -50°F to 400°F. All materials used meet ASME B31.3 and 31.8 requirements.

LOCK-O-RING and LOCK-O-RING Plus completion plugs come standard with welded scarfed nipples allowing coupon to be attached and maintain piggability.

Options

System kits contain the fitting, completion plug, and blind flange, gasket, and bolting.

The following configurations are available: Tapped blind flanges, blind flanges with lifting lugs, Magnetic particle testing for fittings, Buy America, & alternative O-ring types.

All fittings and associated products were developed to meet or exceed market lead times.
